**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 19 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Baldwin et al (5,809,050). See Figure 4D where the surfaces of photodiode 351 on opposite sides of VCSEL 101 are the equivalent of a pair of optical detectors positioned by two opposite sides of the light emitting device.

***Allowable Subject Matter***

3. Claims 1-18 are allowed.

4. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

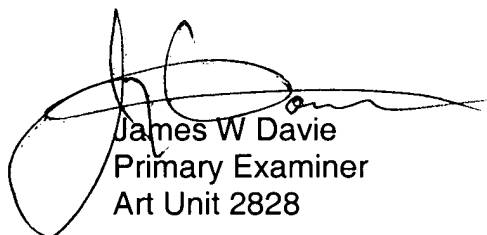

5. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or reasonably suggest a combination of a light emitting device, optical detectors and a diffraction grating wherein the diffraction grating has a structure to cause reflected light to be targeted on the detectors in a desired ratio.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
